SPECIAL MEETING

At 8:00AM on a motion by Trustee Fredericks, seconded by Trustee Knapp, the Village Board opened a Work Session to discuss the Wood End Sewer Extension project. The Village Administrator summarized the latest project developments and answered some of the previously raised questions. He also provided the Village Board with a draft resolution explaining the connection fees. Residents of Wood End were also in attendance and were provided copies of the resolution.

Sarah Normand of 11 Wood End Lane explained that while she was supportive of the project she did not feel that she should be required to pay a connection fee since she already paid to have a new sanitary sewer line installed in the public r-o-w. There was discussion about Westchester County Health Department connection requirements and the Village Administrator agreed to follow up with the County on that issue. Sarah Normand also expressed concern about the notification process and the Village Administrator agreed to circulate the plans and resolution to the impacted owners not in attendance.

At 8:55AM on a motion by Trustee Behrens, seconded by Trustee Fredericks, the Village Board agreed to close the Work Session.

James M. Palmer, Village Administrator
