

**BOROUGH OF LAKE CITY ORDINANCE #444-22
AN ORDINANCE AMENDING WATER ORDINANCE 256-82.**

The Council of the Borough of Lake City, Erie County, hereby enacts and ordains the following amendment of the Lake City Borough Water Ordinance 256-82 effective August 08, 2022.

Section 70-4 – Installations; assessments.

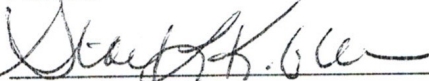

Hereafter, all installations of water mains and service lines shall be made only after the Borough Council is satisfied that the actual revenue accruing to the borough as a result of such extension shall make the same feasible and profitable. A water connection charge for residential properties shall be \$600.00. The water connection charge for commercial, industrial, and institutional properties shall be a residential equivalent as fixed and established by resolution of the Borough with the advice of its consulting engineer. All owners of real estate along the proposed line shall be assessed on a front-foot basis for the full front footage of said property, and the line shall be installed across the entire property frontage; the cost of such line shall be assessed together with the cost of bringing the line to the curb box or the sideline of the highway wherein the borough's water lines are located. In the event that the laying of such lines and the assessment therefor fronts on two sides of a lot, such lot shall be assessed for the longer side and anything in excess of 80 feet on the other side. Said owners of real estate and applicants for service shall be required to bear all expenses of every nature attendant on completion of said service installation, including the costs from the curb stop to the premises served.

Signed:

Mary G. Gollmer
Council President

Attest:

Stacy L. Kibler
Borough Secretary

Approved:

Andrew Graves
Borough Mayor
