E. Municipal and Public Buildings. The city desires to provide certain reduced water and sewer billing charges for public buildings, such as municipal buildings and schools. There shall be a reduction in the quarterly water and sewer charges which is charged to or collected from the owner of the buildings. The amount of the reduction will be 25% less than the amount fixed by the City Ordinance.

F. Calculation of usage. The Water and Sewer utility will assess user fees based on actual water usage as reported by the appropriate water/sewer purveyor. However, should the user have a separate discharge meter in place, the sewer usage will be calculated as the actual flow discharged into the system. Water meters certified in writing from the appropriate water purveyor as used solely for the purpose of metering water usage of irrigation systems and swimming pools shall be exempt from excess sewer usage charge. Such certification must identify the separate account number assigned to the meter, meter location, property owners name and billing address. Exempt meters under this provision must be recertified annually to the City. The cost of certifying exempt water meters will be the responsibility of the respective property owner.

G. Appeals. Users who believe that either flow or classification has been improperly calculated may appeal by submitting written documentation to the City Tax Collector.

H. Effective Date. This Ordinance shall take effect immediately upon passage publication according to law.

BE IT FURTHER ORDAINED, any ordinances or parts thereof in conflict with the provisions of this ordinance are repealed to the extent of such conflict.

BE IT FURTHER ORDAINED, this ordinance shall take effect upon adoption and approval in accordance with applicable law.
