Motions/Discussion

The committee met to discuss the \$50,000 granted to the city to build a start up portal, which would make it much easier for small business's to go through the the required permitting on line. Alderman Bloomer had some ideas that possibly could make it easier and cheaper to add to or edit this portal in the future. We decided to work out these issues at tonights BOA meeting. Vote was 2 to 1.

There are two motions to come out of this meeting.

We make the motion to authorize the Mayor to send out a RFP for the development of the this start up portal retroactively. I so move.

We also make a motion to confirm the Mayors selection of Collaboration 133 to design a start up portal for the city of Rutland I. so move.
