

**ORDINANCE OF THE TOWNSHIP OF WINSLOW, COUNTY OF CAMDEN, STATE
OF NEW JERSEY CREATING CHAPTER 203 ENTITLED “PRIVATELY-OWNED
SALT STORAGE” ESTABLISHING REQUIREMENTS FOR THE STORAGE OF SALT
AND OTHER SOLID DE-ICING MATERIALS ON PRIVATELY OWNED
PROPERTIES, INCLUDING RESIDENCES**

WHEREAS, as part of the stormwater requirements of the MS4 Tier A permit, the New Jersey Department of Environmental Protection (NJDEP) requires municipalities to adopt NJDEP-mandated regulations for privately owned salt and other solid de-icing materials storage; and

WHEREAS, The Township Solicitor and Engineer have reviewed the NJDEP model ordinance and recommend that the Governing Body consider adoption; and

WHEREAS, the Governing Body desires to adopt the NJDEP model ordinance with some minor amendments.

NOW, THEREFORE BE IT RESOLVED by the Mayor and Township Committee of the Township of Winslow, County of Camden and state of New Jersey as follows:

SECTION I. Chapter 203 of the Township Code of the Township of Winslow entitled “Privately-Owned Salt Storage” is hereby created with the following regulations:

§ 203-1. **Definitions.**

As used in this article, the following terms shall have the meanings indicated:

DE-ICING MATERIALS

Any granular or solid material such as melting salt or any other granular solid that assists in the melting of snow.

IMPERVIOUS SURFACE

A surface that has been covered with a layer of material so that it is highly resistant to infiltration by water.

STORM DRAIN INLET

The point of entry into the storm sewer system.

PERMANENT STRUCTURE

A permanent building or permanent structure that is anchored to a permanent foundation with an impermeable floor, and that is completely roofed and walled (new structures require a door or other means of sealing the access way from wind driven rainfall).

A FABRIC FRAME STRUCTURE

A permanent structure if it meets the following specifications:

1. Concrete blocks, jersey barriers or other similar material shall be placed around the interior of the structure to protect the side walls during loading and unloading of de-icing materials; and
2. The design shall prevent stormwater run-on and run through, and the fabric cannot leak; and
3. The structure shall be erected on an impermeable slab; and
4. The structure cannot be open sided; and
5. The structure shall have a roll up door or other means of sealing the access way from wind driven rainfall.

PERSON

Any individual, corporation, company, partnership, firm, association, or political subdivision of this State subject to municipal jurisdiction.

RESIDENT

A person who resides on a residential property where de-icing material is stored.

§ 203-2. **De-icing Material Storage Requirements.**

- A. Temporary outdoor storage of de-icing materials in accordance with the requirements below is allowed between October 15th and April 15th:
1. Loose materials shall be placed on a flat, impervious surface in a manner that prevents stormwater run-through; and
 2. Loose materials shall be placed at least 50 feet from surface water bodies, storm drain inlets, ditches and/or other stormwater conveyance channels; and
 3. Loose materials shall be maintained in a cone-shaped storage pile. If loading or unloading activities alter the cone-shape during daily activities, tracked materials shall be swept back into the storage pile, and the storage pile shall be reshaped into a cone after use; and
 4. Loose materials shall be covered as follows:
 - a. The cover shall be waterproof, impermeable, and flexible; and
 - b. The cover shall extend to the base of the pile(s); and
 - c. The cover shall be free from holes or tears; and
 - d. The cover shall be secured and weighed down around the perimeter to prevent removal by wind; and

e. Weight shall be placed on the cover(s) in such a way that minimizes the potential of exposure as materials shift and runoff flows down to the base of the pile.

(1) Sandbags lashed together with rope or cable and placed uniformly over the flexible cover, or poly-cord nets provide a suitable method. Items that can potentially hold water (e.g., old tires) shall not be used; and

5. Containers must be sealed when not in use; and

6. The site shall be free of all de-icing materials between April 16th and October 14th.

B. De-icing materials should be stored in a permanent structure if a suitable storage structure is available. For storage of loose de-icing materials in a permanent structure, such storage may be permanent, and thus not restricted to October 15 -April 15.

C. All temporary and/or permanent structures must also comply with all other Township ordinances, including building and zoning regulations.

D. The property owner, or owner of the de-icing materials if different, shall designate a person(s) responsible for operations at the site where these materials are stored outdoors, and who shall document that weekly inspections are conducted to ensure that the conditions of this ordinance are met. Inspection records shall be kept on site and made available to the municipality upon request.

1. Residents who operate businesses from their homes that utilize de-icing materials are required to perform weekly inspections.

§ 203-3. **Exemptions.**

A. Residents may store de-icing materials outside in a solid-walled, closed container that prevents precipitation from entering and exiting the container, and which prevents the de-icing materials from leaking or spilling out. Under these circumstances, weekly inspections are not necessary, but repair or replacement of damaged or inadequate containers shall occur within 2 weeks.

B. If containerized (in bags or buckets) de-icing materials are stored within a permanent structure, they are not subject to the storage and inspection requirements in Section II above. Piles of de-icing materials are not exempt, even if stored in a permanent structure.

§ 203-4. **Enforcement.**

This ordinance shall be enforced by Winslow Township Code Enforcement Officer during the course of ordinary enforcement duties.

§ 203-5. **Violations and Penalties.**

Any person(s) who is found to be in violation of the provisions of this ordinance shall have 72 hours to complete corrective action. Repeat violations and/or failure to complete corrective action shall result in fines as follows: \$500 per day.

§ 203-6. **Severability.**

Each section, subsection, sentence, clause, and phrase of this Ordinance is declared to be an independent section, subsection, sentence, clause, and phrase, and finding or holding of any such portion of this Ordinance to be unconstitutional, void, or ineffective for any cause or reason shall not affect any other portion of this Ordinance.

SECTION 2: All Ordinances or parts of Ordinances inconsistent with this Ordinance are hereby repealed to the extent of such inconsistency.

SECTION 3: If the provisions of any section, subsection, paragraph, subdivision, or clause of this Ordinance shall be judged invalid by a court of competent jurisdiction, such order of judgment shall not affect or invalidate the remainder of any section, subsection, paragraph, subdivision, or clause of this Ordinance.

SECTION 4: This Ordinance shall take effect immediately upon final passage and publication in accordance with law.
