The Contractor shall not be liable for any loss or damage attributable solely to the negligence of the City. Contractor's sole remedy against the City for any claimed breach shall be limited to specific performance of the Agreement, including payment not to exceed the lawfully due compensation, but in no event shall the City be liable for or subject to any claim for damages, costs or attorneys' fees arising from this Agreement.

7. Multi-year contracts; Non-appropriation. Notwithstanding any provision herein to the contrary, the City is obligated only to make the payments set forth in this Agreement as may lawfully be made from funds budgeted and appropriated for that purpose during the City's then current fiscal year at the discretion of the City. If no funds are appropriated or otherwise made legally available to make the required payments for this Agreement during the next occurring fiscal year (an "Event of Non-appropriation"), this Agreement will terminate at the end of the then current fiscal year as if terminated expressly. The failure or inability of the City to appropriate funds for this Agreement in any subsequent fiscal year shall not be deemed a breach of this Agreement by any party. The Contractor shall submit to the

City its statement for the aforesaid amount, in such reasonable detail as the City shall request, within thirty (30) days after such date of termination. The City shall not be liable to the Contractor for any damages on account of such termination for loss of anticipated future profits with respect to the remainder of the Work.

Precision Concrete Cutting

Precision Concrete Cutting (PCC) has been removing trip hazards from uneven sidewalks and other concrete walkways across the nation for over 25 years. As the industry leader in technology and price, PCC can reduce liability associated with uneven sidewalk and help meet ADA compliance with a method more effective and less expensive than alternatives. PCC utilizes its patented tools and processes that it has developed and refined for trip hazard removal. Not only is trip hazard removal the specialty of PCC... it's the only thing we do. PCC has dozens of locations across the country. Precision Concrete, Inc. is the locally licensed business unit serving Missouri, Michigan, Illinois, and Indiana that leverages the proven tools, process, and training to provide this service.

The Advantage

The Precision Concrete Cutting (PCC) service removes the entire trip hazard from side to side on the entire sidewalk while other methods of repair often leave a portion of the trip hazard. Not only can PCC reach the edges of every sidewalk, we can remove trip hazards from virtually any angle and at any location. Trip hazards caused by cracked concrete or located in hard-to-reach places such as in gutters or adjacent to a wall, post, or railing will be eliminated without any damage to nearby impediments. **There is no other process of trip hazard removal available with the quality, flexibility, and diversity as that of PCC.**

Quality

The Precision Concrete Cutting (PCC) process involves the measurement of every sidewalk trip hazard identified. PCC inspects the sidewalks and takes specific measurements to identify and log each trip hazard size and location. These measurements are used to determine the size of repair that is required, and to guarantee that the repair is made to dimensional specifications.

The PCC finished repair is aesthetically pleasing, smooth, and of superior quality compared to alternatives. It does not leave grooves in the surface of the concrete, it is not uneven, and is left with an acceptable coefficient of friction to not create slip hazards.

Environmental & Community Friendly

The Precision Concrete Cutting (PCC) process does not require heavy equipment in the work area. The PCC equipment is small and maneuvered about by individual employees. No damage is created to buildings, landscaping, irrigation systems, or the surrounding environment. Complete cleanup of the work area is performed and dust abatement systems minimize dust. All materials removed are properly recycled.

PCC utilizes a patented dust collection system to keep dust to a minimum while performing its work. This is a great benefit over other repair processes that leave the area covered in concrete dust or slurry. PCC also cleans up the removed concrete and debris created while performing the repairs and disposes (for recycle) of it as part of the service. Being a complete solution, no follow-on tasks are required of the City of Wildwood staff. Sidewalks remain open with only minor disruption while PCC moves thru an area performing the trip hazard removals.

As a member of the U.S. Green Building Council (USGBC) we are proud of the fact that we reduce the impact to landfills and the environment as a result of our service. For example, **removing and replacing just 50 sidewalk panels would result in approximately 60,000 lbs of concrete being removed** (your average 5' x 5' panel weighs about 1,200 lbs). Using Precision Concrete Cutting, sidewalk trip hazard removal can be accomplished by removing about 400 lbs of concrete that will be recycled. No heavy equipment or hauling is required. Also, there is no damage to trees or adjoining landscape with Precision Concrete Cutting.

Real Savings

Precision Concrete Cutting (PCC) leverages new technology and unique equipment to perform sidewalk repairs at a 70-80% cost savings compared to sidewalk replacement. It is estimated that this project will **save City of Wildwood over \$360,000 on repairs.**

Professional Plan and Approach

Precision Concrete Cutting (PCC) will conduct a pre-construction planning meeting with the City of Wildwood designated contact(s) using a PCC Project Manager to establish priorities, a high-level schedule for each job site, review risks/constraints, and safety plans. The Project Manager will assure schedule, scope, and budget objectives are attained for the project. The PCC Delivery Manager will assure quality and safety objectives are attained during the onsite work phase of the project.

PCC will deploy a well-marked light-duty pickup truck/van and full logo trailer used to mobilize up to three (3) full sets of cutting equipment and operators. Safety cones are placed wherever the truck/van and trailer park and they are placed on the sidewalks in front of and behind the operator area to assure pedestrian safety during cutting. All PCC staff (including project manager) wears high-visibility safety vests whenever they are outside their vehicle.

Scope and Cost

Precision Concrete Cutting (PCC) is proposing a SAW CUT solution (NOT GRINDING) for the City of Wildwood to remove sidewalk trip hazards on contiguous areas within the Villages of Cherry Hills subdivisions (as prioritized by City). PCC would typically bill for this project at the rate of \$58 per Inch Foot (defined as the average inch height of the trip hazard x linear feet of the hazard). However, PCC will honor Wildwood’s 2023 municipal rate of \$42/IF. For this project, PCC will perform 1,190 IF of trip hazard removal (up to the established project budget). It is estimated this project will resolve over 823+ sidewalk trip hazards.

Billing will be based on actual work performed, up to the approved project budget of \$50,000.

The scope of sidewalk trip hazards for this project (determined by customer) is defined as differentials in the walkway of .50" high up to (including) 2.0" high. Trip hazards will be eliminated leaving a maximum running slope (ramp) of 1:8 as permitted to meet ADA requirements. The work will be performed on City sidewalks in the project areas as prioritized by the City. *Note: the areas listed below may contain more than 1,190 IF of trip removal. PCC will work in the following order, up to the approved or amended City project budget.*

Job No. (Area)	Location	(Remove and Replace) or out of	Estimated # of Trip Hazards Cut	Estimated Linear Feet	Estimated Inch Feet	Cost
1	Village Hills Pkwy (from Manchester Rd to Audubon Village Dr)	0	184	578	230	\$13,340.00

Net Proposed Total: \$50,000.00

***2024 Municipal discount will apply if project accepted prior to February 29, 2024 and with an authorization to proceed with project by March 18, 2024 (weather & schedule permitting).**

Sole Source Status

The technology that Precision Concrete Cutting uses to remove trip hazards has been developed and patented by Precision Concrete Cutting based in Provo, UT. Precision Concrete Cutting and its local branches are the only companies authorized to use the patented equipment and method for removing sidewalk trip hazards as described by the following patent numbers:

U.S. Patent No. 6,827,074
U.S. Patent No. 6,896,604
U.S. Patent No. 7,000,606

U.S. Patent No. 7,143,760
U.S. Patent No. 7,201,644
U.S. Patent No. 7,402,095

These patent numbers and the Precision Concrete Cutting (PCC) licensing agreement make Precision Concrete, Inc. a sole source for trip hazard removal in Missouri using this technology.

Invoicing

A Precision Concrete Cutting (PCC) invoice will be issued for work completed at the conclusion of the project. Payment terms are net 15 days from the date work is completed unless contract states otherwise. PCC will not charge the City of Wildwood any additional fees for mobilization, setup, cleanup, or travel / expenses. All such fees are included in the proposed price.

An itemized invoice listing the location of each trip hazard resolved will be listed and can be provided in hard copy or soft copy as required by the City of Wildwood. This itemized list provides the City with a completely auditable summary of the work performed by PCC. It is also a document that can support the fact that your organization has a proactive sidewalk maintenance program in place.

Summary

Precision Concrete Cutting is very interested in working with the City of Wildwood to deliver a proactive and cost-effective sidewalk maintenance program to help with the efforts of ADA compliance and reduce liabilities associated with sidewalk trip hazards. Our goal is to foster a long-term relationship in which we can help the City of Wildwood achieve its annual sidewalk maintenance objectives.
