Application No. 17-007 OFD Foods – For review of final site plan approval of the development of a 43,000 S.F. industrial building on a 12.12 acre property located at 1000 Rush-Henrietta Town Line Road in an Industrial Zoned District. Part of Tax Account No. 202.01-2-47.1.

Representing Applicant: John Clarke, DDS Engineers

A. The Applicant stated the following:

1. The project consists of developing a facility for a freeze dried, probiotic processing plant and associated offices. The site was chosen for its scenery, woodlands and pond, among other things.
2. The federal wetlands will be protected.
3. Parking will be land banked as greenspace. Future building is not anticipated to need additional parking.
4. There will be roughly seventy percent (70%) greenspace.
5. Storm water for the site will run north into a bio-retention swale, then to a compliant storm water pond for additional filtering, and eventually into the onsite creek.
6. There will be eight (8) acres of disturbed land with three point eight (3.8) acres of impervious.
7. Soil balance is negative and will require roughly four feet (4') of fill.

B. The Henrietta Conservation Board recommends to the Planning Board:

1. The HCB asks that the fill be certified.
2. The HCB requests that final landscaping plans be submitted for review.
3. The HCB appreciates the seventy percent (70%) greenspace.

On a motion by R. Bud Synder, seconded by Robbin Ciavaglia, Application No. 17-007 was recommended to the Henrietta Planning Board to be approved.

A. The Applicant stated the following:

1. The site plan is an amendment to the original subdivision.
2. NYS D.E.C. wetlands to the south of the project will be protected with a one hundred foot (100') buffer.
3. The site is sixty-two percent (62%) greenspace. Lot R-1B will be sixty percent (60%) and Lot R-1C will be sixty five percent (65%).
4. The existing storm water pond will be relocated to a larger system. Storm water is collected via curbed bio-retention areas, and is flows southeast to the new pond. The storm water system is also sized to handle all off-site flows expected to hit this site.
5. The soil work is balanced.
6. The truck dock is proposed as flat and non-depressed.

B. The Henrietta Conservation Board recommends to the Planning Board:

1. The HCB requests that final landscaping plans be submitted for review.
2. The HCB appreciates the sixty-two percent (62%) greenspace.

On a motion by J. Steve Coffey, seconded by R. Bud Snyder Application No. 17-008 was recommended to the Henrietta Planning Board to be approved.
