

As a reminder to our residents, permits ARE required for the direct replacement of furnaces, water heaters, central air conditioners and roofs. If an emergency exists (i.e. you have no heat, hot water or your roof is leaking) the replacement can take place prior to obtaining a permit so long as the Building Department is notified by phone prior to work starting. The permit application must be in our office within 72 hours of the phone notification. For more information or any questions, please contact the Building Department at 908-369-5882.
