Road Projects Updates in Hillsborough Township

*Grant to Fund Phase 1 of Beekman Lane
Falcon Road to be Repaired
Route 206 Bypass Next Phase*

Mayor Gloria McCauley provided an extensive infrastructure update regarding the various roadway projects for the Township.

“We are excited to announce that the Township received a N.J.D.O.T. local aid grant of \$508,000 for the repaving of Beekman Lane Phase 1 which is between Amwell Road and Triangle Roads.” announced Mayor Gloria McCauley.

She further went onto thank the Assistant Township Engineer, Mr. Tom Belanger and the Engineering Department for applying for the grant. The original estimate was for \$538,000 so this grant is almost the entire amount. Provided there aren't any unforeseen issues with the section of the roadway the project could possibly be brought in under budget. The Engineering Department will now bid the project this year for construction by the end of this year or early next Spring.

Mayor McCauley then addressed the condition of Falcon Road. “We are aware the condition of the eastbound lane of Falcon Road is in poor condition and the Department of Public Works has been patching the roadway almost daily,” stated the Mayor.

She explained that the developers of Gateway are responsible for rebuilding this roadway which will include widening, drainage and improvements upon the conclusion of the project. However, in the interim the developer has committed to do temporary paving repairs on the eastbound lane weather permitting. It is anticipated this will begin in late March when the asphalt plants reopen.

Finally, the Mayor provided the latest news regarding the Route 206 Bypass. “We have been advised that on or about March 6th, work will begin on the next phase of the bypass. The initial work will involve tree removal which is targeted to be complete by March 31st,” reported Mayor McCauley.

“We are looking forward to these infrastructure improvements to begin soon,” concluded the Mayor.
