Hillsborough Township Building Department Hosts First Contractor's Open House

Educational Sessions to be held on Thursday, September 26th

"The Hillsborough Township Building Department will host a Contractor's Open House on Thursday, September 26th," reported Mayor Frank DelCore at Tuesday's Township Committee Meeting.

"We are always striving to enhance the relationship between our contractors and the Township, and the next phase is this informational session held by our construction and subcode officials to assist applicants with an understanding of Code Enforcement," continued Mayor DelCore.

The topics to be discussed in this open forum will include an overview of the Code Enforcement, changes in the code that impact the construction industry, instruction on completing a permit application. In this informational session contractors, architects and other professionals will be provided with step by step instructions and guidance in completing the required documentation for construction projects. This will ultimately assist permit applicants with the necessary resources to navigate the system in a more effective and efficient manner, decreasing the permit approval timeframe.

This contractor open house is another step in balancing the needs of contractors with respect to regulations of the building department.

Contractors wishing to participate have the choice of two sessions to choose from:

Session one: 3:30 pm until 5 pm

Session two: 5 pm until 6:30 pm

Contact Rich Perlman at 908-369-4313 x7172 of rperlman@hillsborough-nj.org for more information or to register for this informational session. Deadline for registration is Monday, September 23rd.

About the Hillsborough Building Department:

The Building Department is here to assist the public, contractors, and design professionals by providing quality service that is knowledgeable, efficient, comprehensive, and helpful. The department effectively promotes and provides professional plan review, permitting, and inspections of proposed or ongoing construction projects in the community. Navigating the code books and required construction documents may feel cumbersome but this office is here to help guide the community through the process. This department is entrusted with the responsibility to promote code awareness and expertise, assuring building safety and code compliance for the residents.
