Said activity within 100 feet of a wetlands and watercourse is a violation of Section 22a-42a (c) (1) of the Connecticut General Statutes and Sections 6.1 and 6.2 of the Inland Wetlands and Watercourses Regulations for the Town of North Branford, Connecticut.

The members walked the property and took note of the stream water that looked clear and fresh. The stream on the northwestern side of the property continually runs and is water from Lake Gaillard. The stream on the southeastern side of the property is part of Munger Brook. The two streams merge at this property.

There are additional maples near the corner of the property that are in good shape. There are willows toward #33 that look good and seem as though they will thrive.
The proposed sheds would be on an 18x12 platform.

The doors of the sheds would open toward #33 property. Concrete would be spread to level the sheds, which would be independent of the house.

Respectfully Submitted,

Michele Pollock, Recording Secretary

Stephen Scavo, Chairman
