The group met and discussed the site walk and questions that could be asked, which needed to be directly relevant to the location of proposed construction. Mr. Giudice pointed out the stakes that had been placed to delineate various lot locations, proposed homes to be built, septic system location, detention basin and their distance from the wetlands.

Members asked questions to gain a clear understanding of the proposed plan and any possible affects that building may have on the area. Mr. Giudice answered questions and clarified locational information for the Committee Members.

The site walk will be discussed at the next IWWA Meeting on November 15, 2017.
