

Town of Pinedale Snowplowing Policy

October 28, 2019

1. Roads will be plowed when a storm produces 2 to 3 inches of snow at the common sense discretion of the Public Works Director and staff.
2. Pine Street will be plowed when a storm produces 1 inch or more of snow.
3. All intersections in Town shall be sanded on the braking or deceleration side after each storm or when the intersections are slick.
4. Sanding will be prioritized. Pine and the intersections onto Pine will have priority. After the heavily traveled streets have been sanded and plowed all other intersections in Town will be sanded.
5. The snow pile in the center of Pine Street shall be removed when it reaches a height of approximately 2 ½ feet.
