**Town of Pinedale – Bipolar Ionization Installation**  
**Request for Quotes**

**Scope of Work**

The scope of this project is to provide and install Needlepoint Bipolar Ionization GPS Units (or approved equal) at three Town of Pinedale Facilities. The purpose of the project is to aid in the protection of Pinedale citizens and its visitors from the coronavirus and other airborne pathogens and pollutants. The proposed equipment must be capable of removing, killing, or rendering inactive pathogens including viruses. The equipment shall utilize bipolar ionization and be capable of being retrofitted in the existing HVAC systems of each building. No new HVAC ducts, fans, furnaces, etc. will be added as part of this project, as the intent is to utilize the existing HVAC system to deliver air treatment to each facility or served area of the building. The equipment shall not emit any gases including ozone or other potential harmful gases.

The bid shall include properly sizing the necessary equipment for each building, as well as providing the equipment, installation, and maintenance manuals for each unit. The Town of Pinedale is seeking bids on the following units:
